ISTANBUL KULTUR UNIVERSITY / Turkey

AVIATION AND FLIGHT INSTRUCTOR

Construction

Aviation Planner

August 2021 - August 2022 (1 years)

Flight Dispatcher performs all flight planning required for operation of flights primarily on safe basis, and monitors the flight throughout the flight.

Flight Dispatcher refers to the person who informs the flight crew at any phase of a flight in order to ensure that the flight is maintained on secure and safe basis in the light of the request of the Pilot-in-Command or the information received, who monitors the flight in order to ensure that the details in relation to the flight are forwarded to the concerned divisions, who enables that the details in relation to an emergency (sabotage, accident destruction, hijacking, etc.) are reported to the concerned divisions, and who have been licensed by the Directorate General of Civil Aviation.

Flight Dispatchers ensure that all aircraft are prepared for the respective flights in a rapid and safe manner as possible. They ensure that all various operations/processes and services in relation to preparation of any aircraft for the respective flight are combined in the right order and at the right time in a manner to enable that the aircraft takes off at the scheduled

time of departure.

Flight Dispatchers monitor any and all activities covering the processes for cleaning, refueling and loading of baggage and cargo, get in close contact with the cabin crew and aircraft technicians to make sure that the aircraft is ready to take-off, and act in unison with such persons.
